OFFER

AB Astra LT is the largest designer and producer of stainless steel tanks and pressure vessels in the Baltic and Scandinavian countries. Our main products are storage, process, mixing tanks and pressure vessels made from stainless steel and duplex steel for use in various areas, including the food, chemical and nuclear industries. Our newest product is a foodstuff stainless steel road tanker (semitrailer), with very promising prospects for success in the European market. The company runs the latest automated plasma/TIG/HOT WIRE TIG/Subarc/MIG technologies as well as CNC machining of large-dimension parts, stainless steel pickling and other related technologies.
