OFFER

What do you get when you merge the best of telecommunications and informatics? It's Telematics – a short word that holds so much inside, starting from simple monitoring of a vehicle and leading further to effective resource management, optimization of costs, increased driver safety, easy handling of maintenance issues, prevention of vehicle thefts and many more discoveries.

Teltonika Telematics is one of the leading manufacturers and wholesalers in the telematics industry worldwide. As part of the Teltonika IoT Group, the company manufactures and supplies GPS tracking devices, relevant accessories, and software solutions for the effective management of any size fleets. Time-tested and brand-new products are being used daily in various market niches and industries, ranging from car-sharing and logistics to special utility transport and indoor tracking.

Being fully committed to Teltonika slogan Easy Key to IoT, we successfully collaborate with thousands of long-term business partners from over 150 countries worldwide.
