

Name of the company: Metec, UAB
Address: Rudaminos g. 1A LT-13275 Skaidiskes, Vilniaus distr., Lithuania
WEB site: www.metec.lt

Contact person: Eduard Gurskij
Position: Head of the Construction department
Phone: +370 5 215 9927
E-mail: e.gurskij@metec.lt

Year of foundation: 2005
Number of employees: 110
Turnover in 2021 EUR: 4.00 mil. EUR
Main markets: Germany

Business profile: METEC is a Lithuanian company - supplier to the automotive industry of stamped, formed, welded parts with own construction and tools department

Core product/services range: Tool design, tool making, stamped and formed metal parts, welded metal parts, assemblies

Capabilities:
eccentric pressing from coils with 250-400 ton presses
hydraulic pressing, with 250-400 ton presses
manual pressing, with 60-225 ton presses
manual resistance welding
manual MAG/MIG welding
robotic MAG/MIG welding
robotic resistance welding
tumbling
assembly and packing

Certificates: ISO 9001: 2006; ISO 14001: 2018; IATF 16949:2022

OFFER

STAMPED AND FORMED PARTS - Stamping, bending and deep drawing of complex metal parts with maximum precision in series production: this is our specialty. We work with all common types of steel and special steel, as well as copper and aluminium alloys. Material thickness: 0.5 - 5.00 mm

ASSEMBLIES - Assembly manufacturing is one of our key specialties today. We use a variety of joining technologies to join different parts together in an intelligent, permanent way. This includes robotic MAG/MIG welding, resistance welding, robotic resistance welding, riveting, screwing and bolting, beading and clenching.

TOOLMAKING - Tool engineering is always an integral part of product development. Modern CAD systems, (NC-controlled machines, forming presses and our employees' know-how help deliver solutions for even the most demanding tasks.
