About SLT-IC

SLT Industrial Components (SLT-IC) solve your problems.
We have 30 years of manufacturing history in Lithuania.

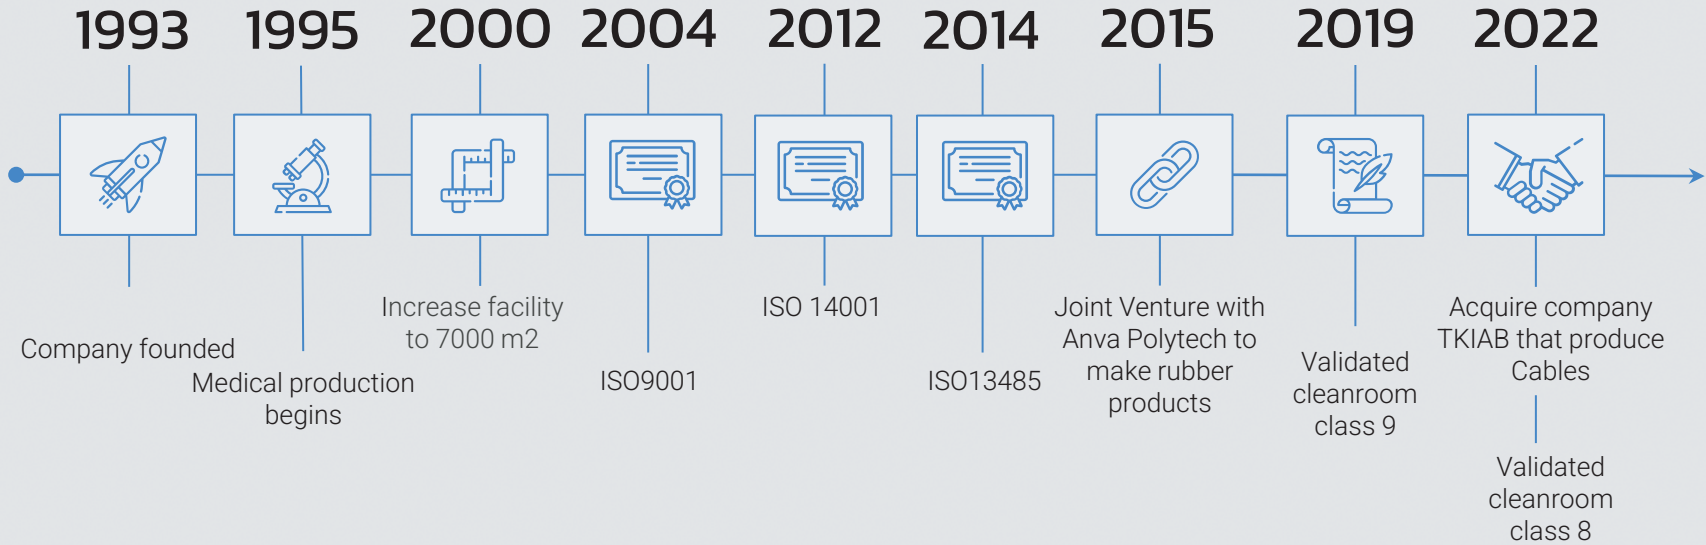

Today the company is working towards the industrial and medical sectors. There are now around **200 employees** in a production facility of **12 000 square meters**. The customers are companies in the automotive, outdoor power equipment and medical sectors with high demands.

During 2023 **SLT-IC** delivered more than **22 000 000 products** to industrial and medical customers.

Brief overview:

- Company founded in 1993
- Production in Lithuanian and Sweden
- PPM: 78
- Delivery precision: 99%
- Growth 20%

History

Family business

“The company works in a competitive environment which means we always must develop our processes. To work with continuous improvements is crucial to create a long term customer value. The focus of the company is quality, delivery, cost and sustainability.

Åke Stenquist - Founder and Chairman of the board

“As a second generation running family business I feel the importance of carrying on the great work that has been done during the last 30 years. To understand the customer specific requirements, and by that, setting up an effective production is the main key of having satisfied customers.

Anders Stenquist - CEO

02.

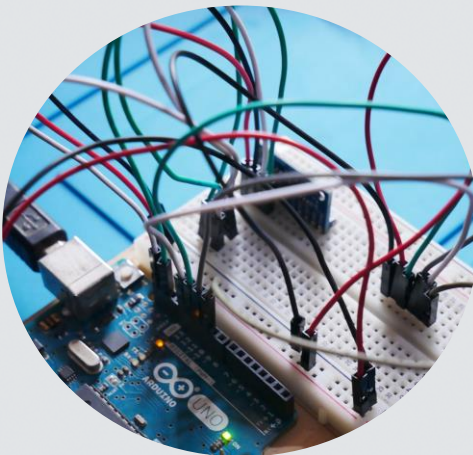

Competence

We deliver to different industries and are highly responsive to customer demands.

Assembling

Wiring systems

Rubber

Assembling

SLT-IC provides an assembly service for industrial and medical components. This could be manual assembly or production in semi-automatic custom-made machines. We work with the customer to decide on the best process in which the product will be made. **SLT-IC** can be responsible for developing the production equipment, or conversely it can be provided by the customer. We work with several different materials such as plastics, rubber and metal.

Suitable products

- High labor content
- Capacity problem
- Expensive with full automation
- Not certain volume /products phasing out
- Season variations

Management systems

ISO9001 / ISO14001 / ISO13485

Wiring systems

SLT-IC provides, via its company **Tierps kablageindustri** in Sweden, cable solution and box building. We have a wide range of customers from prototype to automotive customers with high volume demands.

Service provided

- Assembling custom made wiring systems
- Mechanical/Electrical assembling
- Fully automatic cutting machines
- Injection molding of plastic on cables
- Product review
- Storing products to reduce delivery time.

Machines

Schleuniger Crimpcenter 36 fully automatic / Schleuniger Crimpcenter 60 fully automatic / Schleuniger Crimpcenter 64 fully automatic / Schleuniger MegaStrip 9650 up to 300mm² / Battenfeld Servo Power CM40 molding machine

Management systems

ISO9001:2015 / ISO14001:2015

Rubber

SLT-IC provides rubber components that are produced in a joint venture with **Anva Polytech**. The production unit is in Lithuania and has been operating since 2014. Customers are mainly in automotive industry, forest and garden equipment.

Capabilities

- 2 horizontal injection moulding machines
- 1 horizontal injection moulding machines with robot demolding
- 7 vertical injection moulding machines
- Assembling

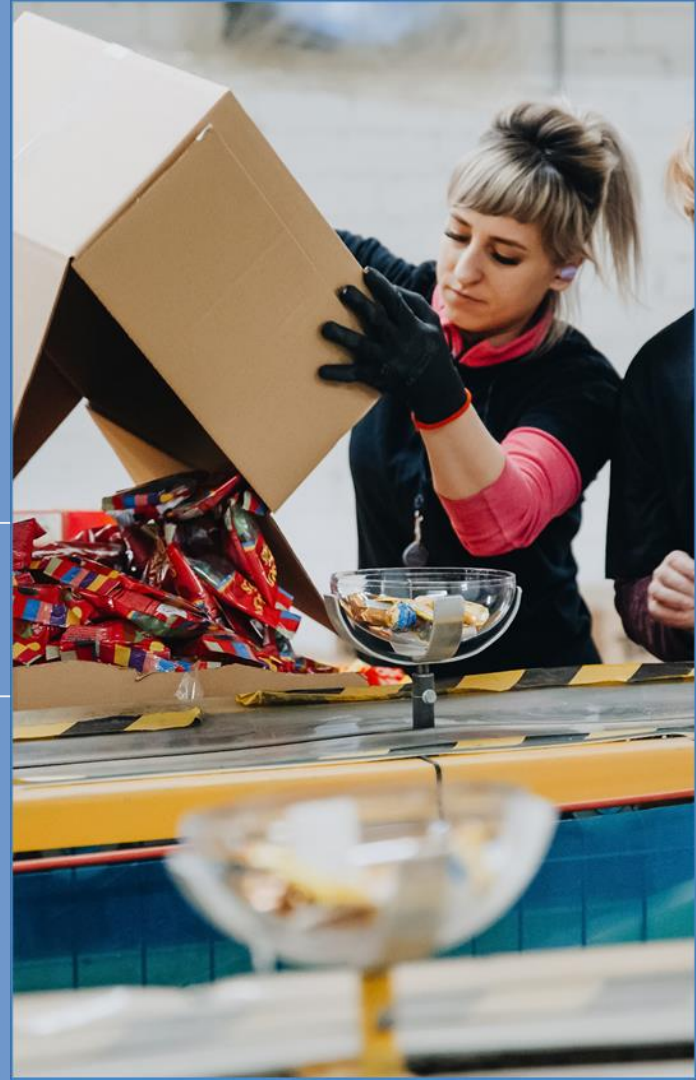

Management systems

IATF16949 • ISO14001

03.

Customer benefits

We are highly responsive to customer demands and delivering to different industries.

Quality

Our long history in delivering to automotive and medical customers have given experience of setting up a robust system to delivery required quality.

Delivery

Our location makes it possible to make deliveries to Sweden and central Europe within two days. Delivering products on time is of high importance to us, which is made evident by our 99% delivery precision.

Costs

We strive to provide attractive and competitive prices to our clients. We work according to LEAN principles in our never-ending self-improvement. By choosing us our customer usually reduce their cost by 20+%.

Sustainability

To maintain a sustainable business model is important for us. This means minimizing the footprint we leave behind. But also to take social responsibility in the community where we operate. Such as sponsoring local sports, cultural events and being an attractive and responsible employer.
