

MA **HINERYASSIST**

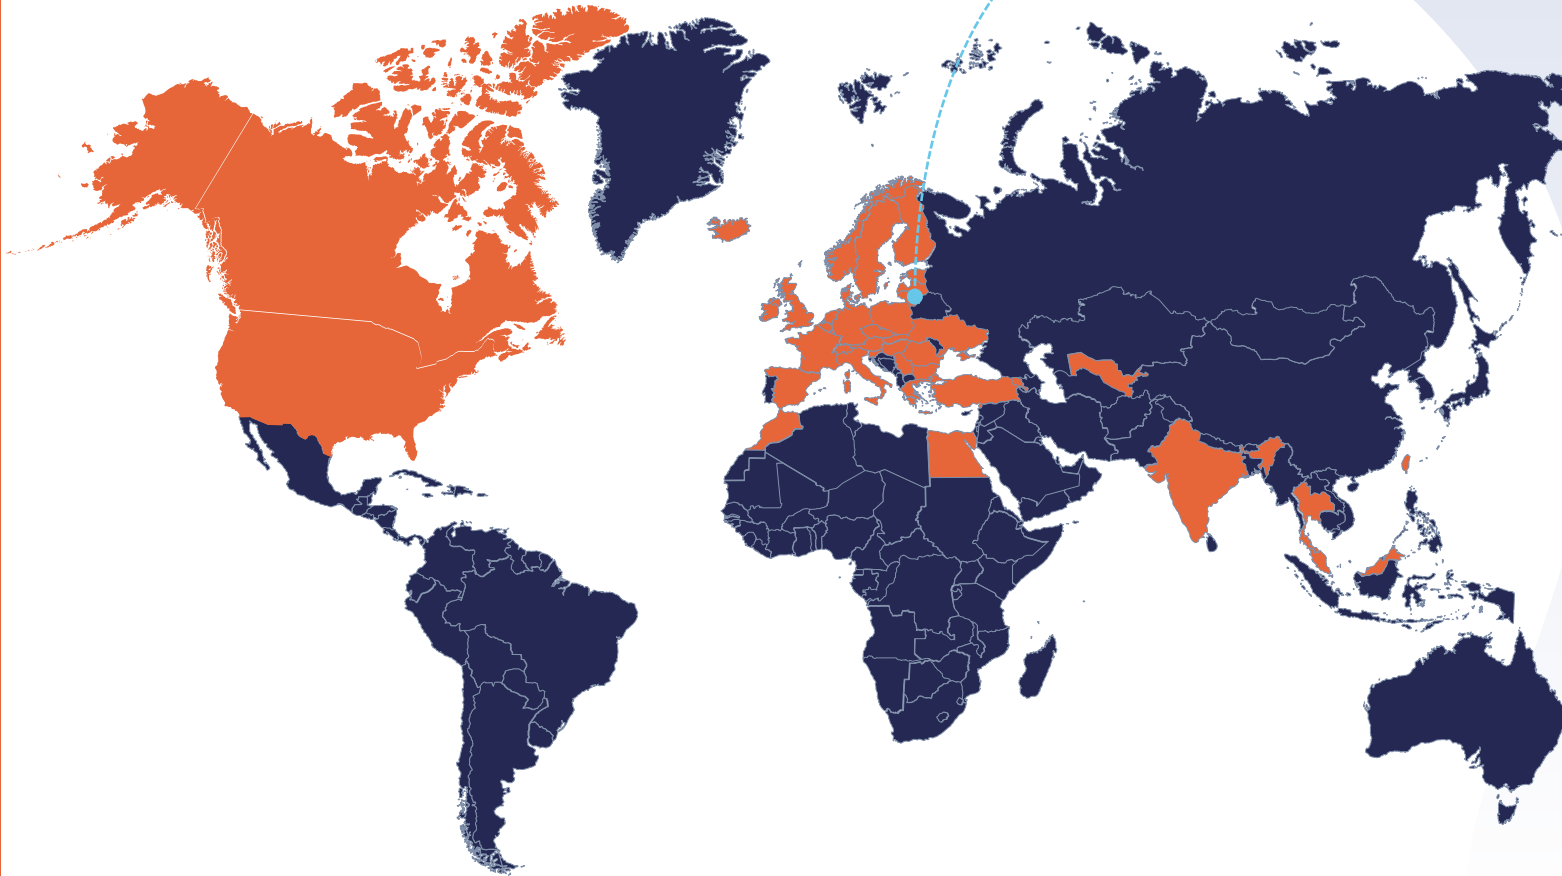

ONE PARTNER FOR MACHINERY MOVING, INSTALLATION, AND RETROFITTING

Empowering European Industries with 120+ Engineering Team

Who We Are

Engineering Solutions for Machinery Installation, Relocation and Modernization

*Driven by Innovation. Delivered by Experts.
Since 2016.*

projects in **40** countries worldwide

+ 120 service professionals

+ 320 happy clients from automotive,
metal processing, packaging and etc.
industries

Engineering Projects are Complex and Full of Uncertainties

These real challenges affect what matters most: completing projects on time, within budget, in scope, with the ROI you planned.

Moving Deadlines

Projects **exceeding** planned schedules, affecting production start dates

Coordination Gaps

Multiple vendors create communication challenges and **unclear** responsibilities

Budget Overruns

Costs **increasing** by up to 30%, impacting planned ROI

Resource Constraints

Need for specialized skills and certifications only available **temporarily**

Production Disruptions

Extended **downtimes** resulting in lost manufacturing capacity and customer contracts

That's why we offer full-scope support for...

Machinery Installation

Machinery Moving

Machinery Retrofitting

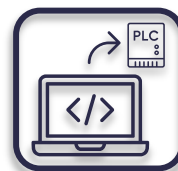

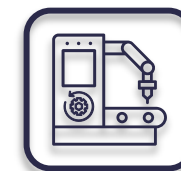

**Automation
& Robotics**

**CE Certification
& Modernization**

PLC programming

**Machinery Retrofitting
& Modernization**

What We Do: Machinery installation

We provide comprehensive installation assistance to OEM manufacturers and end users implementing new production lines.

- Logistics from the pre-acceptance stage at the machinery manufacturer through delivery
- Complete mechanical assembly and precision alignment
- Electrical installation and initial system validation
- Specialized tools and heavy lifting equipment deployment
- Machinery commissioning and start-up support
- Integration into existing production flows and systems

Launch new production on a strict schedule and within budget while eliminating multi-vendor coordination challenges.

What We Do: Machinery Moving

Regardless of whether it is production machinery relocation within a factory or to another country or continent, we can handle it for you!
From single lines to entire factories.

- Comprehensive move planning and project management
- Detailed decommissioning and systematic disassembly
- Equipment marking, documentation, and defect recording
- Specialized packaging for safe transportation
- Secure loading, transport, and unloading logistics
- Expert reassembly and installation at the new site
- Complete equipment dry-run and validation

Production capacity to a new location with minimal downtime and predictable costs.

What We Do: Machinery Retrofitting

Improving manufacturing equipment OEE and production capacity doesn't always require new machinery investment. Our engineering capabilities extend to advanced technical improvements.

- Control cabinet and automation system retrofits and upgrades
- PLC programming
- Hydraulic system retrofitting
- Mechanical restoration and optimization
- Equipment adaptation for evolving production needs
- Performance improvement and throughput enhancement

Extend equipment life and increase throughput without the capital expense of new machinery.

Our Commitment to Excellence

MACHINERYASSIST

Empowering European Industries

All our services are delivered with consistent quality assurance

Dedicated project management with single point of contact

Adherence to certification requirements and company internal procedures

Fully insured services protecting your investment

Experienced professionals with industry-specific expertise

Compliance with all local labor, health and safety regulations

Flexible resource allocation to match project phase requirements

They Trust Us
